RS232 Unit	1.3	
Switch Panel SP12	1.15*	
Connect-50	1.65*	
Programming Interface	1.3	
Programming Interface v2	1.21*	New Product Introduction
Interface Unit ICU	1.1	
Connect-HPR	1.7	
Connect ONE	1.6	
* = New versions in this firmware		

Compatibility

When upgrading the firmware in an installation it is always recommendable to upgrade all the modules to the same firmware version throughout the whole system to ensure that all new features are supported.

EmpirBus Studio Requirement

*Important notice. Firmware Version **1.0.207** requires EmpirBus Studio version **1.15.0.11190** or higher. You can check your program version in menu "Help" – "About EmpirBus Studio". To upgrade EmpirBus Studio, connect your computer to internet and start the EmpirBus Studio software, and the automatic software upgrade check will update your software.*
